

Gippsland Environment Group *Grevillea celata* survey

**Date of survey 21-11-2025 - Waypoints 828-840**

Date of report 08-12-2025

On Lyles Bk in **Nowa Nowa Lyles Brk planned burn GP-TBO-NOW-0368**

<https://plannedburns.ffm.vic.gov.au/burn-site/3009968>

Below: Map of survey area. This document contains photographic evidence, GPS coordinates and field observations of **waypoints 828-840**

Waypoint	Garmin 64 Zone 55 H	Description: On Lyles Break within the burn site – surveyed 21-11-2025
Waypoint 828	593738.69 m E 5828550.89 m S	Yellow posts in State Forest mark sites of significant vegetation - in this case presumably for <i>Grevillea celata</i> . One <i>Grevillea celata</i> plant found under bulldozed slash heap near bulldozed scrape around the tree at the yellow post.
Waypoint 829	593728.01 m E 5828550.13 m S	Seven <i>Grevillea celata</i> plants under felled tree plus ten <i>Grevillea celata</i> plants less than 10mtrs away
Waypoint 830	593696.22 m E 5828554.37 m S	
Waypoint 831	593700.15 m E 5828551.00 m S	
Waypoint 832	593702.04 m E 5828546.21 m S	One <i>Grevillea celata</i> plant under pushed up dirt from dozer works created when felling tree. Four other <i>Grevillea celata</i> plants adjacent within 10mtrs
Waypoint 833	593663.77 m E 5828530.66 m S	

<b>Waypoint</b> 834	593652.54 m E 5828528.57 m S	Bulldozed and scraped circle around tree with ten <i>Grevillea celata</i> under pushed up dirt. Seven other plants nearby within 5 mtrs of the pushed up dirt
<b>Waypoint</b> 835	593640.17 m E 5828526.27 m S	Felled tree beside five <i>Grevillea celata</i> plants within 1-5mtrs
<b>Waypoint</b> 836	593622.32 m E 5828515.48 m S	Felled tree – two <i>Grevillea celata</i> plants within 5mtrs
<b>Waypoint</b> 837	593621.38 m E 5828518.16 m S	Anthill smashed by bulldozer and tree felling works
<b>Waypoint</b> 838	593560.23 m E 5828491.55 m S	Two <i>Grevillea celata</i> plants right at edge of roadside slashing beside old pink tape marking <i>Grevillea celata</i> on ground
<b>Waypoint</b> 839	593529.04 m E 5828477.59 m S	Felled tree on top of pink tape marking <i>Grevillea celata</i> plants. One dead <i>Grevillea celata</i> plant visible under the felled tree. Five <i>Grevillea celata</i> plants at the edge of dozer works
<b>Waypoint</b> 840	593524.27 m E 5828500.84 m S	Four felled trees. Five <i>Grevillea celata</i> plants affected by tree felling debris

Below: **Waypoint** 828 – the yellow post location indicating significant vegetation – presumably *Grevillea celata*. A bulldozer has scraped around the tree in pre burn preparation works. Red arrow marks a *Grevillea celata* plant found under bulldozer debris.

Below: **Waypoint 828** - the yellow post location  
Red arrow marks a *Grevillea celata* plant found under bulldozer debris

Below: **Waypoint 828** - the yellow post location  
*Grevillea celata* under bulldozer debris

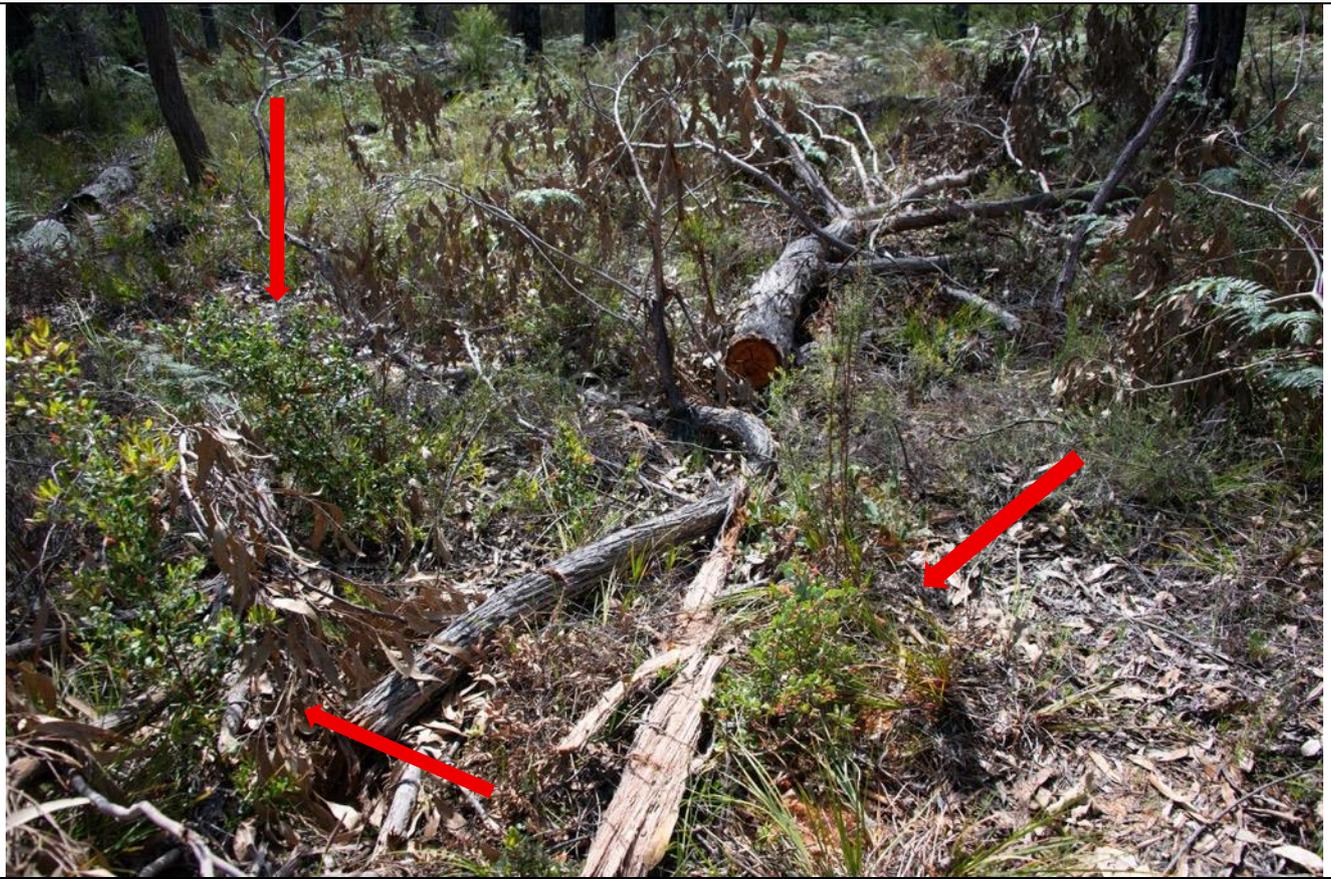

Below: **Waypoint 828** - the yellow post location  
Close up of the *Grevillea* plant pulled out from under the bulldozer debris

Below: **Waypoint 829 - 831**  
View from the road – red arrows mark felled tree. Seven *Grevillea celata* plants were found under this felled tree. Ten *Grevillea celata* plants were found less than 10mtrs away

Below: **Waypoint** 829 – 831 Seven *Grevillea celata* plants under felled tree plus ten *Grevillea celata* plants less than 10mtrs away. Red arrows mark *Grevillea celata* plants

Below: **Waypoint** 829 - 831 Red arrows mark living and dead (squashed) *Grevillea celata* plants under felled tree debris

Below: **Waypoint** 829 – 831 Seven *Grevillea celata* plants under felled tree plus ten *Grevillea celata* plants less than 10mtrs away. Red arrows mark *Grevillea celata* plants under debris

Below: **Waypoints** 832-833

Left: Felled tree on the roadside.

One *Grevillea celata* plant (below) was found under pushed up dirt from dozer works created when felling this tree.

Four other *Grevillea celata* plants were found within 10mtrs of this felled tree.

Below: **Waypoints** 832-833

Red arrow marks *Grevillea celata* plant found under pushed up dirt from dozer works created when felling the tree above.

Below: **Waypoints** 832-833

Close up of the *Grevillea celata* plant found under pushed up dirt from dozer works created when felling this tree.

Below: **Waypoint 834**

Bulldozed and scraped circle around tree with ten *Grevillea celata* plants found under pushed up dirt (red arrow) Seven other plants were found nearby within 5 mtrs of the bulldozed circle

Below: **Waypoint 834**

Red arrow marks one of the *Grevillea celata* plants found under pushed up dirt from dozer works created when scraping around the above roadside tree.

Below: **Waypoint 834**

Red arrow marks *Grevillea celata* plants found under pushed up dirt from dozer works created when scraping around the above roadside tree.

Below: **Waypoint 834**

Red arrow marks *Grevillea celata* plants found under pushed up dirt from dozer works created when scraping around the above roadside tree.

Below: **Waypoint 834**

Red arrow marks *Grevillea celata* plants found beside dozer works around this tree

Below: **Waypoint 834**

Red arrow and circle marks more *Grevillea celata* plants found under pushed up dirt from dozer works created when felling the above tree.

Below: **Waypoint 835**

Bulldozer scrape and felled tree beside five *Grevillea celata* plants within 1-5mtrs

Below: **Waypoint 835**

Bulldozer scrape and felled tree beside five *Grevillea celata* plants within 1-5mtrs

Below: **Waypoint 835**

Bulldozer scrape and felled tree beside five *Grevillea celata* plants within 1-5mtrs

Below: **Waypoint 835**

Bulldozer scrape and felled tree beside five *Grevillea celata* plants within 1-5mtrs

Below: **Waypoint 836**

Felled tree near two large and significant *Grevillea celata* plants within 5mtrs

Below: **Waypoint 836**

Felled tree near two large and significant *Grevillea celata* plants within 5mtrs

Below: **Waypoint 836**

Felled tree near two large and significant *Grevillea celata* plants within 5mtrs. Looking back from large *Grevillea celata* plant to felled tree. Red arrow marks *Grevillea celata* plant

Below: **Waypoint 836**

Felled tree near two large and significant *Grevillea celata* plants within 5mtrs.

Below: **Waypoint 837**

Anthill smashed by bulldozer and tree felling works

Below: **Waypoint 838**

Two *Grevillea celata* plants right at edge of roadside slashing beside old pink tape on the ground marking *Grevillea celata*. Circle marks *Grevillea celata*. Left arrow marks old pink tape to mark *Grevillea celata* plants. Bottom arrows mark slashed area

Below: **Waypoint 838**

*Grevillea celata* plants right at edge of roadside slashing beside old pink tape marking *Grevillea celata*

Below: **Waypoint 839**

Felled tree on top of pink tape marking *Grevillea celata* plants. One dead *Grevillea celata* plant visible under the felled tree. Five *Grevillea celata* plants at the edge of dozer works. Circle marks the pink tape and dead squashed *Grevillea celata* plant.

Below: **Waypoint 839**

Felled tree on top of pink tape marking *Grevillea celata* plants. One dead *Grevillea celata* plant visible under the felled tree. Five *Grevillea celata* plants at the edge of dozer works. Arrow marks the pink tape to mark *Grevillea celata* plants.

Below: **Waypoint 839**

Felled tree on top of pink tape marking *Grevillea celata* plants. One dead *Grevillea celata* plant visible under the felled tree. Five *Grevillea celata* plants at the edge of dozer works. Circle marks the dead squashed *Grevillea celata* plant.

Below: **Waypoint 840**

Four felled trees. Five *Grevillea celata* plants affected by tree felling debris. Circle indicates *Grevillea celata*

Below: **Waypoint 840**

Five *Grevillea celata* plants affected by tree felling debris. Circle indicates *Grevillea celata*

Below: **Waypoint 840**

Dead *Grevillea celata* plants affected by tree felling debris.

Below: **Waypoint 840**

Dead *Grevillea celata* plants affected by tree felling debris.

Below: **Waypoint 840**  
Trees felled into *Grevillea celata* plants

Below: **Waypoint 840**  
*Grevillea celata* plants affected by tree felling debris. Circle indicates *Grevillea celata*

Below: **Waypoint 840**

Above image – up close – trees felled into *Grevillea celata* plants
